

OIL & GAS

Recommended Frames

604 Jack Herbert

Modern plastic wrap frame, moulded to the face, leaving no gap for microparticles to harm the eye. Anti-slip temples, sleek design made to fit under helmets.

607 Viper

Full coverage above, beside and underneath the eyes for extra protection against toxic elements, dust and chemical burns

Recommended Lens Coatings

BPI TINT YELLOW: Total acuity in vision for low-light environments.

POLARISATION: NuPolar lenses block blinding glare, enhance visual acuity and colour.

Block 100% of harmful UVA and UBA

IOAC's Certified Prescription Safety Eyewear provide clear, distortion free vision with superior quality optics.

Many workers in the oil and gas industry neglect their health and face inherent safety risks on the job, one of these being failure to comply within Australian standards of wearing prescription safety eyewear.

There is extreme heat, UV exposure and toxic elements including Mercury and Hydrogen Sulfide (H₂S) found on these worksites, that may cause permanent damage to the eyes, throat and lungs.
